

Maya Reich

Full Stack Software Engineer

Amsterdam, NL | +31 621325571 | mayareich0606@gmail.com | github.com/mreich06

Dutch HSM Visa Holder | Eligible to work in The Netherlands

PROFESSIONAL SUMMARY

Full Stack Engineer with 4+ years building production web and mobile applications with React, TypeScript, React Native, and Next.js. Strong focus on frontend architecture, performance optimization, API integration, and modern React development.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, React Native, HTML5, CSS3, Tailwind CSS, SSR/SSG/CSR

Backend: Node.js, Express.js, REST APIs, GraphQL, Prisma, PostgreSQL, Zod, PHP 8.2, WordPress

Testing: Vitest, React Testing Library, Playwright

DevOps & Cloud: AWS (CodePipeline, CodeBuild, S3, IAM, Elastic Beanstalk, Secrets Manager), Docker, GitHub Actions, Jenkins

Tools: Git, GitHub, Figma, Kibana, Sentry

PROFESSIONAL EXPERIENCE

Lean Management Instituut | Zeist, The Netherlands

Jan 2026 - Present

Full Stack Software Engineer

- Built an internal course management platform from scratch in Next.js, React, TypeScript, Tailwind, PostgreSQL, and Prisma, implementing role-based auth (Auth.js), typed REST endpoints, Zod validation, and SFTP integration
- Automated course publishing by building a custom XML feed generator that integrates ActiveCampaign and external study provider APIs with server-side auth and structured error handling
- Established the team's first CI pipeline with GitHub Actions, running lint, typecheck, and Vitest/Playwright tests on every pull request, reducing bugs reaching staging
- Architected the public-facing website as a custom WordPress theme using PHP 8.2, Tailwind, Vite and Docker Compose with clean data modeling, no ACF or page builders

Rakuten | Tokyo, Japan

Jan 2024 - Jul 2024

Front-End Software Engineer

- Developed and shipped customer-facing features in React and TypeScript for Rakuten Ichiba, Japan's largest e-commerce platform with 40M+ active users, on one of the company's highest-revenue teams
- Improved page load times by 24% from 3.7s to 2.8s by implementing a hybrid SSR/CSR architecture, lazy-loading non-critical components, and reducing initial JavaScript bundle size
- Optimized the existing Backend-for-Frontend (BFF) layer with backend teams, reducing client-side API calls by 30%
- Contributed to CI/CD pipelines using AWS CodePipeline, CodeBuild, Docker, and Jenkins, integrating automated E2E testing with Playwright

Viasat | San Diego, CA, USA

Sept 2019 - Nov 2022

Full Stack Software Engineer

- Developed MyViasat, a cross-platform React Native application for web, iOS, and Android, with end-to-end ownership of the payment portal and integrating internal Payments team APIs, improving checkout completion by 11%
- Led the implementation of user analytics by building a custom pixel tracker and Kibana dashboards, enabling the team to analyze user behavior and drive product improvements
- Transitioned the MyViasat monolith to a microservices architecture, enabling faster feature releases, reducing initial load times by 35% and cutting agent-reported software issues by 67%

EDUCATION

Middlebury College 2015 - 2019

Bachelors in Computer Science

LANGUAGES

English (Native) | Japanese (Native) | Dutch (Beginner)
