

Maya Reich

Full Stack Software Engineer

Amsterdam, NL | +31 621325571 | mayareich0606@gmail.com | github.com/mreich06

Dutch HSM Visa Holder | Eligible to work in The Netherlands

PROFESSIONAL SUMMARY

Full Stack Engineer with 4+ years building production web and mobile applications with React, TypeScript, React Native, and Next.js. After three years at Viasat, relocated from the U.S. to Japan to complete an intensive Japanese language program, leading to a front-end role on one of Rakuten's highest revenue teams. Currently based in The Netherlands, focused on frontend architecture, performance optimization, API integration, and modern React development.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, React Native, HTML5, CSS3, Tailwind CSS, SSR/SSG/CSR

Backend: Node.js, Express.js, REST APIs, GraphQL, Prisma, PostgreSQL, Zod, PHP 8.2, WordPress

Testing: Vitest, React Testing Library, Playwright

DevOps/Cloud: AWS (CodePipeline, CodeBuild, CodeDeploy, ECR, ECS, CloudWatch, S3, IAM, Elastic Beanstalk, EC2, Secrets Manager), Docker, GitHub Actions, Jenkins

Tools: Git, GitHub, Figma, Kibana, Sentry, Claude Code

PROFESSIONAL EXPERIENCE

Lean Management Instituut | Zeist, The Netherlands

Jan 2026 - Present

Full Stack Software Engineer

- Built an internal course management platform in Next.js, React, TypeScript, Tailwind, PostgreSQL/Prisma, implementing role-based auth (Auth.js), Zod-validated REST endpoints, and SFTP integration for third-party feed delivery
- Eliminated manual course updates, automating publishing with a custom XML generator, and synced enrollments to ActiveCampaign via REST APIs, with server-side API authentication and structured error handling
- Built and maintained a CI/CD pipeline (GitHub Actions) with Vitest and Playwright test suites, accelerating test creation with AI-assisted tools
- Developed a performant WordPress theme using PHP 8.2, Tailwind, Vite and Docker with custom data architecture

Rakuten | Tokyo, Japan

Jan 2024 - Jul 2024

Front-End Software Engineer

- Developed and shipped customer-facing features in React and TypeScript for Rakuten Ichiba, Japan's largest e-commerce platform with 40M+ active users
- Improved page load times by 21% from 3.7s to 2.9s by implementing a hybrid SSR/CSR architecture, lazy-loading non-critical components, and reducing initial JavaScript bundle size
- Optimized the existing Backend-for-Frontend (BFF) layer with backend teams, reducing client-side API calls by 17%
- Contributed to CI/CD pipelines using AWS CodePipeline, CodeBuild, Docker, and Jenkins, integrating automated E2E testing with Playwright

Viasat | San Diego, CA, USA

Sept 2019 - Nov 2022

Full Stack Software Engineer

- Developed MyViasat, a cross-platform React Native application for web, iOS, and Android, with end-to-end ownership of the payment portal and integrating internal Payments team APIs, improving checkout completion by 11%
- Led the implementation of user analytics by building a custom pixel tracker and Kibana dashboards, enabling the team to analyze user behavior and drive product improvements
- Transitioned the MyViasat monolith to a microservices architecture, enabling faster feature releases, reducing initial load times by 35% and cutting agent-reported software issues by 53%

EDUCATION

Middlebury College 2015 - 2019

Bachelors in Computer Science

LANGUAGES

English (Native) | Japanese (Fluent) | Dutch (Beginner)
