

Maya Reich

Senior Full Stack Engineer

Amsterdam, NL | +31 621325571 | mayareich0606@gmail.com | github.com/mreich06 | mayareich.dev

Eligible to work in The Netherlands

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 4+ years building production web and mobile applications with React, TypeScript, React Native, and Next.js. After three years at Viasat, relocated from the U.S. to Japan to complete a Japanese language program, leading to a front-end role on one of Rakuten's highest revenue teams. Currently based in The Netherlands as a Senior Full Stack Engineer at Lean Management Instituut, and founder of Visihire, a SaaS product that integrates all facets of a job search, from tracking to outreach, into one AI-driven tool.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, React Native, HTML5, CSS3, Tailwind CSS, SSR/SSG/CSR

Backend: Node.js, Express.js, REST APIs, GraphQL, Prisma, PostgreSQL, Zod, PHP 8.2, WordPress, OpenAI API

DevOps/Cloud: AWS (CodePipeline, CodeBuild, CodeDeploy, Lambda, ECR, ECS, CloudWatch, S3, IAM, Elastic Beanstalk, EC2, Secrets Manager), Docker, GitHub Actions, Jenkins, Vercel

Testing & Tools: Git, Vitest, Storybook, React Testing Library, Playwright, GitHub, Figma, Kibana, Sentry, Claude Code

PROFESSIONAL EXPERIENCE

Lean Management Instituut | Zeist, The Netherlands

Jan 2026 - Present

Senior Full Stack Engineer

- Built an internal course management platform end-to-end in Next.js, React, TypeScript, Tailwind, PostgreSQL/Prisma, implementing role-based auth (Auth.js), Zod-validated REST endpoints, and SFTP integration for third-party feed delivery
- Eliminated manual course updates across multiple different platforms by integrating via REST APIs and a custom XML generator with bidirectional enrollment syncing
- Built and maintained a CI/CD pipeline (GitHub Actions) with Vitest and Playwright; using AI-assisted tools in daily development
- Developed a performant WordPress theme using PHP 8.2, Tailwind, Vite and Docker with custom data architecture

Rakuten | Tokyo, Japan

Jan 2024 - Jul 2024

Front-End Engineer

- Developed customer-facing features in React/TypeScript for Rakuten Ichiba, Japan's largest e-commerce platform (40M+ users)
- Improved page load times by 21% from 3.7s to 2.9s by implementing a hybrid SSR/CSR architecture, lazy-loading non-critical components, and reducing initial JavaScript bundle size
- Optimized the existing Backend-for-Frontend (BFF) layer with backend teams, reducing client-side API calls by 17%
- Contributed to CI/CD pipelines using AWS CodePipeline, CodeBuild, Docker and Jenkins, and E2E testing with Playwright

Viasat | San Diego, CA, USA

Sept 2019 - Nov 2022

Full Stack Engineer

- Developed MyViasat, a cross-platform React Native application for web, iOS, and Android, with end-to-end ownership of the payment portal and integrating internal Payments team APIs, improving checkout completion by 11%
- Led the implementation of user analytics by building a custom pixel tracker and Kibana dashboards, enabling the team to analyze user behavior and drive product improvements
- Transitioned the MyViasat monolith to a microservices architecture, enabling faster feature releases, reducing initial load times by 35% and cutting agent-reported software issues by 53%

FOUNDER EXPERIENCE

Visihire

Jun 2025 - Present

Founder & Solo Developer

- Founded Visihire (visihire.com) after identifying a gap: job seekers juggle spreadsheets, CVs, cover letters and LinkedIn messages. Designed a single connected workflow for job applications, documents and outreach
- Developed a Kanban-style application tracker, a CRM to track contacts, ATS CV scoring and personalized outreach generation
- Integrated LLM APIs into the product using prompt design, structured output parsing, and evaluation to power CV scoring

EDUCATION

Middlebury College 2015 – 2019 | Bachelors in Computer Science
